Innovative Expertise

A team-oriented culture, well-defined methodology, state-of-the-art tools and technologies, and a clear vision of the future all contribute to the dynamic environment at Ingeniasoft. As a rapidly growing software organization with a range of clients in North America and Europe, Ingeniasoft partners with our clients to help them get the most out of their e-initiatives and to achieve the minimax criteria – Minimum Risks, Maximum Returns!

Ingeniasoft consultants offer a wide range of expertise - from customization and solution integration to business change management. Our team of qualified professionals can deliver short-term assistance or engage in long-term strategic planning, flexible to your business's needs and growth.

Software Development

Formulate an outsourcing strategy with us, and create a symbiotic relationship leveraging our in-house development services. Subscribe to our services, and watch de-facto industry standards and documentation in action, such as serialization of the expertise gained with each project through a managed repository. Ensure the highest degree of delivered expertise. Ensure success for your company by using our Rapid Development Methodology.

Our Technology Expertise

Our team is well versed in the latest tools and technologies such as Microsoft's .NET & XML initiatives, mobile technologies and PDA-programming tools.

Our Methodology

Ingeniasoft's development methodology is a derivative of the Rational Unified Process™. We practice extensive documentation through all phases of a project. Crisply defined personnel roles help us in achieving our targeted schedules, and past successes enable us to repeat our achievements in the future.

Ingeniasoft follows this repeatable process rigorously, which ensures that knowledge transference is optimal. All projects follow a predefined set of phases and frequent technical reviews ensuring software quality. To Ingeniasoft, only one thing matters: performance under stress and delivering the high quality end solutions.

About INGENIASOFT: Ingeniasoft, Inc. is a software firm that focuses on enterprise-level, web-enabled, workflow automation solutions to solve client business problems. We enable our clients to automate their business processes by deploying our software applications or through custom developed solutions.
