## CUSTOM E-BUSINESS SOLUTIONS

**...”Delivering high quality software solutions is our business.”**

**...”Helping companies transform their businesses by turning their e-business initiatives into reality is our goal.”**

*Managing a business is challenging enough in these competitive times, but to keep ahead and take advantage of new opportunities as they arise takes even more. Companies with a strategy to develop and leverage technology to create new products and services can thrive in this environment where others may fail.*

*At Ingeniasoft, we know what it takes to deliver success – creative ideas, backed by experience and state of the art technology. As a full-service software consulting and application development firm, Ingeniasoft uses innovative technology to provide custom solutions to our clients unique business issues. Using our framework of proven methodologies we deliver top quality results while minimizing time and costs.*

### **Application Design Consulting**

Superior software applications are often the result of better planning at the design stage. Ingeniasoft offers a full range of consulting services to help your company determine how best to solve its business issues.

### **Application Development**

Ingeniasoft is focused on providing turn-key, web-native, client server, and wireless application development. We develop current, state-of-the-art versions of existing applications, as well as custom development to solve specific business problems.

### **Customization, Integration and Data Migration**

Applications offer the most benefit if they are tailored to your exact need, and perfectly integrated into your existing business systems. At Ingeniasoft, we don't feel our job is complete until your application is performing as expected.

#### **Ingeniasoft offers services in these areas:**

- \* Application Design Consulting
- \* Application Development
- \* Customization, Integration and Data Migration
- \* Application Maintenance and Enhancements
- \* Application Re-Engineering
- \* Technology Infrastructure Selection

E-BUSINESS SOLUTIONS

## Ingeniasoft Services (continued)

### **Application Maintenance & Enhancements**

Business needs are dynamic, and the software required to address them needs to be able to change as well. We can provide on-going maintenance and enhancements to make sure your applications perform as required.

### **Application Re-Engineering**

Technologies change along with business needs. Ingeniasoft can help you re-engineer your existing applications utilizing state of the art techniques so that they continue to deliver the results you need.

### **Technology Infrastructure Selection**

Making sure you have the infrastructure in place to receive optimum performance and benefit from your software investment is another added-value service from Ingeniasoft.

## **Ingeniasoft means "VALUE"**

*Choosing Ingeniasoft as your software development partner will allow you to complete your projects on time and within your budget. We deliver top quality solutions, fast, using cutting edge technology and skills which provide maximum value to your business.*

### **Skilled Project Teams**

Multi-disciplined teams with expertise gathered through many years of software development experience allow Ingeniasoft to bring your project to fruition faster. You receive the benefit of our experience through a team assembled whose skills match the exact requirements of your project.

### **Real World Experience**

Ingeniasoft's management has a broad understanding of the business issues facing our clients. With a background of nearly 20 years of information technology problem-solving, working with major blue-chip clients, the Ingeniasoft leadership team is dedicated to providing everything it takes to make your project a success.

### **Offshore Development Model**

Using advanced methodologies for distributed project management, Ingeniasoft seamlessly combines local client relationship and project management with offshore project execution. Ingeniasoft is U.S. owned and based but offers the benefit and flexibility of round-the-clock productivity. This model provides significant speed and cost advantage to our clients.

### **Quality**

Best practices refined over many projects combined with tried and true methodologies allow Ingeniasoft to deliver uncompromising quality. Our system of rigorous processes and check points insure that our focus on quality is consistent and unwavering.

**About INGENIASOFT:** Ingeniasoft, Inc. is a software firm that focuses on enterprise-level, web-enabled, workflow automation solutions to solve client business problems. We enable our clients to automate their business processes by deploying our software applications or through custom developed solutions.
